This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscited® by International Gemological Initiute (LG). A LGO has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are hypically produced by CVD (chemical vapor deposition) or by HPH (high pressure high temperature) grawth processes and may include post growth modifications to change the color. (Gl utilizes the most advanced techniques and equipment currently variable including. Iniccular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIIR, UV-18-NIR, UV
